

QUALITY POLICY

The principal objectives of the Quality Assurance Policy of T Harrison Ltd are to assure the high quality of products and services provided to customers, to ensure that quality requirements are determined and satisfied throughout all phases of the contract performance and to ensure that the products and services supplied to the customer are fit for the purpose. These objectives are achieved by means of clearly defined Quality Assurance Procedures which are rigidly applied throughout all processes.

The procedures described in the quality manual have been introduced for the purposes of achieving sound operational and quality assurance practices within the company. Such procedures conform to the requirements of BS5750 Part 2 and are the minimum standard adopted by the company. All these procedures are mandatory throughout the company and no unauthorised deviations are permitted.

All personnel have a responsibility for quality and are required to conform to the procedures contained in the quality manual. Personnel are encouraged to inform Contracts Managers or Site Supervisors of any changes which could improve quality.

Alternative procedures to those stated in the quality manual, or otherwise required by the customer, shall only be used after agreement with the relevant company management and after their effectiveness and control have been suitably demonstrated.
